

CLASSICAL HOMESCHOOL REVIEW

The Benefits of Classical Education

Classical Education is based on the trivium, which is a three step process of learning. Classical Christian Education combines Classical learning with the Christian World view. It exposes the student to the history, art, and culture of Western Civilization including language, philosophy and literature, but brings it into focus with an awesome understanding of the overarching providence of God in all areas of study.

Determining the Learning Style of Your Child

Determining the learning style of your child is helpful in determining the best way to successfully teach your child the necessary skill of learning. Once you determine the way your child learns, you can adapt your teaching methods to more successfully teach your child. The first thing you need to do is evaluate how your child learns. One great evaluation tool is found on the agelesslearner.com. Depending on the age of your child, you can either have your child answer the questions, or you can determine the answers to the questions by evaluating your child as he plays and learns.

Visual Learner:

Aids to learning: When teaching a subject add colorful pictures, videos, and diagrams. Have your child describe the pic-

Separate Science and History Schedules now available!

Teach the same science and history to more than one child? Easy Classical has now made it possible.

Purchase separate schedules and you can teach different levels of math, spelling, grammar and writing, but keep all of your children on track with history and science.

How to Successfully Enter a Science Fair

Our second son Matthew won third place last year in the Regional Science Fair that was held at ECU.

The possibility of entering a science fair will often times strike fear in the hearts of the homeschool mom. "I hate science," you say, "How could I possibly help my son or daughter put together a project worthy of such an event". "Who has the time," you reason. "I am just too busy." Well if these are your thoughts. Think again. The science fair project might not be as hard as you think. Here are some simple steps you can follow to make your child's science fair project a success.

Choose a Topic: This is called "The Problem". The best way to choose a problem is to think about the interests of your child. What piques his interest? What problem is he interested in solving? Does he wish you would let him drink more soda and eat more candy? Then let him do a study on the effects of soda on tooth enamel. His problem might be stated as..."What is the effect of soda in relation to tooth decay?"
